

There is some confusion on how the yellow card is to be completed. A member should not be keeping their own card. A member in the group should keep your card. The member in the group keeping your card should verify your score with you.

For handicapping purposes, the score may be no more than NET DOUBLE BOGEY on a hole.

Net Double Bogey = double bogey (2) + any handicap strokes you receive on a hole. Handicap strokes received is determined by your course handicap and the hole handicap. To determine what score will be posted add the par + 2 and the strokes which you would receive. For example: you score a 9, on a par 4. The maximum score which should be posted is 4 (par) plus double bogey (2), plus 1 stroke for handicap, maximum score to post would be a 7.

Know where you get strokes.

The large bold numbers indicate the difficulty of the holes (which is the hole handicap). A player who has an 11 handicap would receive one stroke on holes 1, 3,4, 6-9 and two strokes on hole 2 and 5. Holes 2 and 5 are the number 1 and 2 handicap holes.
